PROFESSIONAL SUMMARY

Dedicated Full-Stack Developer with over 3 years of coding experience specializing in building scalable, data-heavy web applications. Expert in the Laravel framework, PHP, and modern frontend technologies like React (TSX) and Tailwind CSS. Proven track record in database management and complex schema design using MySQL and SQL Server. Combines strong problem-solving skills with a user-centric approach to deliver clean, maintainable, and high-performance digital products.

WORK EXPERIENCE

Full-Stack Developer Intern (486-hour OJT)

Mar 2026 – Jun 2026

City of Ilagan Medical Center | Ilagan City, Philippines

- Led the digital revolution of patient record-keeping as part of a 486-hour internship program, working alongside IT professionals to spot problems and improve inefficient paper trail systems.
- Authored comprehensive technical documentation and system summaries, validating the successful completion of the practical experience requirement and ensuring smooth knowledge transfer to the hospital's IT team.

FEATURED PROJECTS

CIMC Record Viewer

2026

- Created a complete digital system for archiving patients' records, which created a highly reliable and easily accessible database for medical professionals.
- Drafted a highly-efficient searching and updating system with real-time addition of image capabilities, making it easier for physicians to review patient histories.

Mt. ClaRamuel Resorts Reservation System

2025 – 2026

- Design architecture for real-time online resort booking site that will handle payment and prevent any manual errors that could lead to duplicate bookings.
- Built a centralized admin dashboard to streamline daily operational workflows, reducing staff training time by delivering intuitive interfaces and clear user manuals.

Abuan Booking System

2024

- Created a reservation management dashboard using CRUD operations that offered the admins a strong tool for handling facility reservations.
- Included features like authentication and role-based access control to ensure security and data integrity so that unauthorized changes to database entries could be avoided.

Pageant Tabulation System

2023

- Developed centralized scoring application for automated calculation of mathematical formulae using the judges' dashboards, providing immediate and error-free live leaderboards.
- Integrated live data synchronization to process concurrent score submissions, enhancing event transparency and audience engagement with real-time updates.

EDUCATION

Bachelor of Science in Information Technology

2022 – 2026

Isabela State University | Ilagan City, Philippines

TECHNICAL SKILLS

Programming Languages: PHP, JavaScript, TypeScript, Python, HTML5, CSS3

Frontend Technologies: React, Tailwind CSS, Bootstrap

Backend Technologies: Laravel, Django, RESTful API Development

Databases: MySQL, Microsoft SQL Server (MSSQL), SQLite, Query Optimization, Database Design

Tools & Platforms: Git, GitHub, VS Code, Figma, ngrok

CERTIFICATIONS & ACHIEVEMENTS

- Relational Database Design** – Microsoft (March 2026)
- SQL Foundations** – Coursera (March 2026)
- Research Presenter ("ReserveMate: A Web-Based System")** – 1st International Conference (September 2025)
- Top Performer (Excellence in Assessment)** – DICT Region II Python Essentials
- IT Specialist in Database** – Certiport (June 2024)
