

RICHTER P. MAYANDOC

Front-End Developer

+63 916 982 4195 | rmayandoc0625@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL EXPERIENCE

- City of Ilagan Medical Center
Full-Stack Developer Intern
03/2026 – 06/2026
- Spearheaded the digital transformation of patient records by designing a database solution during a 486-hour internship, reducing physical file volume by 20% while effectively eliminating reliance on inefficient paper trails.
 - Collaborated with IT professionals to diagnose system bottlenecks and engineered technical improvements that enhanced workflow efficiency.
 - Documented complex technical workflows, producing comprehensive system manuals that facilitated seamless knowledge transfer for the hospital's internal IT team.

FEATURED PROJECTS

- Credential & Academic Verification**05/2026 – 06/2026
 - Built a secure platform leveraging automated document validation to streamline authentication processes.
 - Integrated tamper-proof reporting logic to strengthen data security and reduce fraudulent activities.
- CIMC Record Viewer**03/2026 – 06/2026
 - Developed a centralized medical database system; optimized images and refined database architecture to reduce storage footprint by 20% while enabling faster patient history reviews.
 - Implemented robust image upload support to enhance the accessibility and reliability of digital patient archives.
- Mt. ClaRamuél Resorts Reservation System**06/2025 – 03/2026
 - Architected an end-to-end online booking system featuring integrated payment handling and logic to prevent 100% of duplicate reservations.
 - Designed a centralized admin dashboard, reducing staff training time through an intuitive user interface.
- Abuan Booking System**08/2024 – 12/2024
 - Engineered a facility management dashboard utilizing CRUD operations for efficient booking control.
 - Deployed Role-Based Access Control (RBAC) to guarantee data integrity and secure the database against unauthorized access.
- Pageant Tabulation System**08/2023 – 12/2023
 - Developed an automated scoring engine with real-time leaderboard computation capabilities.
 - Enabled live data synchronization for concurrent judge submissions, ensuring 100% accuracy and transparency during live events.

EDUCATION

Bachelor of Science in Information Technology
Isabela State University
2022 – 2026 (Expected)

KEY SKILLS

- Programming Languages:** PHP, JavaScript, TypeScript, Python, HTML5, CSS3
- Frontend Technologies:** React, Tailwind CSS, Bootstrap
- Backend Technologies:** Laravel, Django, RESTful API Development, Webhooks
- Databases:** MySQL, Microsoft SQL Server (MSSQL), SQLite, Query Optimization, Database Design
- Tools & Platforms:** Git, GitHub, VS Code, Figma, Ngrok
- Professional Traits:** Friendly, Problem-solving, Team Collaboration, Adaptability.

CERTIFICATIONS & ACHIEVEMENTS

- Relational Database Design** – Microsoft (March 2026)
- SQL Foundations** – Coursera (March 2026)
- Research Presenter ("ReserveMate: A Web-Based System")** – 1st International Conference (September 2025)
- Top Performer (Excellence in Assessment)** – DICT Region II Python Essentials
- IT Specialist in Database** – Certiport (June 2024)
